DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 6-10 have been considered but are moot in view of the new ground(s) of rejection. The examiner agrees that Roeseler does not teach: determining a route in the on-board vehicle navigation system in a vehicle. However, the prior art submitted by the applicant teaches: determining a route in the on-board vehicle navigation system in a vehicle. Therefore, it would have been obvious to one of ordinary skill in the art to combine the aforementioned references in order to provide a faster response to the user.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 6-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roeseler et al (6,317,684) in view of Hessing et al (6,334,089).

As per claims 6 and 9, Roeseler discloses:

- transmitting information from a control center to the vehicle information system for use in providing optimized route planning, wherein only delta information representing required necessary deviations from a previously determined route for driving an alternative section of the route is transmitted

from the control center to the vehicle navigation system (column 3, lines 36-49).

Roeseler does not disclose determining a route in the on-board vehicle navigation system in a vehicle. However, Hessing teaches it in column 3. Therefore, it would have been obvious to one of ordinary skill in the art to combine the aforementioned references in order to provide a faster response to the user.

As per claim 7, Roeseler discloses transmitting the current vehicle position, a destination of the route and database version information to the control center to initiate optimized route planning (column 8, lines 22-29).

As per claims 8 and 10, Roeseler discloses:

- distributing the motor vehicle traffic flow among a plurality of detour segments in a controlled manner when there is a traffic problem and a plurality of feasible detour routes are available (column 3, lines 41-49).

Roeseler does not disclose transmitting information from a control center to an onboard vehicle navigation system in a vehicle to prevent a traffic problem. However, Hessing teaches it in column 3. Therefore, it would have been obvious to one of ordinary skill in the art to combine the aforementioned references in order to provide a faster response to the user.

3. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 8/8/03 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
